

Delaware Life Accelerator PrimeSM Variable Annuity

Subaccount Performance Summary

As of May 31, 2021

Performance data below represents past performance which does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of an investment will fluctuate so that accumulation units in the contract, when redeemed, may be worth more or less than their original cost.

Non-Standardized Performance results reflect fund fees and expenses (after any applicable fee waivers or expense reimbursements) and the asset charge of 1.20%. These results do not include withdrawal charges, the contract fee, or any charges for optional living and optional death benefits. If these charges were included, they would reduce the performance shown. Returns for investment options, also known as Subaccounts, and underlying funds that were in existence prior to the investment option inception date in the separate account have been adjusted to reflect the asset charge, as if the contract had existed during the stated period(s).

Performance results are for Delaware Life Accelerator PrimeSM Variable Annuity, first available on May 3, 2021.

Monthly Non-Standardized Performance as of 05/31/2021

Performance data below represents past performance which does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of an investment will fluctuate so that accumulation units in the contract, when redeemed, may be worth more or less than their original cost.

Adjusted Non-Standardized Performance results reflect underlying fund fees and expenses (after any applicable fee waivers or expense reimbursements) and the asset charge of 1.20%. They additionally reflect the applicable withdrawal charge at the following rates: 8%, 7%, 6%, 6%, 5%, 4% and 3% during the 7-year withdrawal charge period and the \$30 contract fee (prorated for a median sized contract of \$100,000 and waived if the net contract value > \$100,000 contract anniversary). These results do NOT include any charges for optional living and optional death benefits, which would also reduce the performance shown. Returns for investment options that were in existence prior to the variable investment option inception date in the separate account have been adjusted to reflect the asset charge, as if the contract had existed during the stated period(s).

Standardized Performance results reflect underlying fund fees and expenses (after any applicable fee waivers or expense reimbursements) and the asset charge of 1.20%. They additionally reflect the applicable withdrawal charge at the following rates: 8%, 7%, 6%, 6%, 5%, 4% and 3% during the 7-year withdrawal charge period and the \$30 contract fee (prorated for a median sized contract of \$100,000 and waived if the net contract value > \$100,000 contract anniversary). These results do NOT include any charges for the optional living and optional death benefits, which would also reduce the performance shown.

Performance results are for Delaware Life Accelerator PrimeSM Variable Annuity, first available on May 3, 2021. Assumptions: \$1,000 allocated 100% to an investment option. The inception date of an underlying fund is the date that a fund commenced operations. The inception date of an investment option is the date that an investment option was added to the separate account.

- Designated Investment option—Eligible investment option for the Income Control GLWB rider, Armor Ten GMAB, Armor Seven GMAB, Armor Flex Ten & Armor Flex Seven GMPB riders.
- ◆ The investment options marked that are available to be illustrated. All investment options may not be available at all selling firms.
- † 7-Day Yield for Money Market Subaccount: The current yield reflects the current earnings of the Fund, while the total return refers to a specific past holding period. The 7-Day Yield is the average income return over the previous seven days, assuming the rate stays the same for one year. It is the Fund's total income net of expenses, divided by the total number of outstanding shares and includes any applicable waiver or reimbursement. Absent such waivers or reimbursements, the yield would have been lower.

MFS® Variable Insurance Trust II U.S. Government Money Market Portfolio
Performance for the week of 05/24/2021 -- 05/31/2021

Sub-Account	Current Yield	Effective Yield
MFS® Variable Insurance Trust II U.S. Government Money Market Portfolio	-0.69%	-0.69%

Performance data below represents past performance which does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of an investment will fluctuate so that accumulation units in the contract, when redeemed, may be worth more or less than their original cost.

You could lose money by investing in the Money Market Fund. Although the Money Market Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. The Money Market Fund may impose a fee upon sale of your shares or may temporarily suspend your ability to sell shares if the Money Market Fund's liquidity falls below required minimums because of market conditions or other factors. An investment in the Money Market Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.

The Performance data below represents past performance which does not guarantee future results. Current performance may be lower or higher than the performance quoted. The investment return and principal value of an investment will fluctuate so that units in the contract, when redeemed, may be worth more or less than their original cost.

Performance results of the Subaccounts for Delaware Life Accelerator PrimeSM Variable Annuity assume a \$1,000 initial Purchase Payment was invested in units of each of the subaccounts displayed above.

Delaware Life Accelerator PrimeSM Variable Annuity is issued by Delaware Life Insurance Company, Waltham, MA 02451, and distributed through its affiliated broker-dealer Clarendon Insurance Agency, Inc. (member FINRA). Product availability and features may vary by state.

Issued on Contract: ICC21-DLIC-VA-C-01 (state variations may apply).

Rider Numbers: ICC21-DLIC-VA-GLWMPB-01, ICC21-DLIC-VA-GLWMPB-02, ICC21-DLIC-VA-GMAB, ICC21-DLIC-VA-GMAB, ICC21-DLIC-VA-HAVDB, and ICC21-DLIC-VAROPDB (state variations may apply).

Performance current to the most recent month-end is available at www.delawarelife.com.

This material must be preceded or accompanied by a current contract prospectus and the underlying Fund prospectuses. Prospectuses for the Delaware Life Accelerator PrimeSM Variable Annuity and the underlying Funds are available from your financial professional or at www.delawarelife.com. The investment objectives, risks and policies of the investment options, as well as other information about the investment options, are described in the respective fund prospectuses. Investors should consider the investment objectives, risks, charges and expenses of the investment company carefully before investing. Please read the current contract and underlying Fund prospectuses before investing or sending money.

Variable annuities are subject to investment risks, including the possible loss of principal. Variable annuities are long-term investments designed for retirement purposes. Variable annuities have limitations, exclusions, charges, termination provisions and terms for keeping them in force. The contract value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth less than its original value, even when an optional living benefit is elected. All product guarantees, including optional living and death benefits, are subject to the claims-paying ability and financial strength of the Delaware Life Insurance Company.

Withdrawals of taxable amounts are subject to ordinary income tax and if made before age 59½, may be subject to a 10% federal income tax penalty. Distributions of taxable amounts from a non-qualified annuity may also be subject to an additional 3.8% federal tax on net investment income. Withdrawals will reduce the contract value and may reduce any optional living and optional death benefits. Withdrawals may be subject to withdrawal charges.

Returns show the maximum withdrawal charge for a Purchase Payment that has been in a Contract for seven Contract Years, beginning on the Issue Date at 8% and decreasing each Contract Year thereafter to 0%. The charge for Contract Years 0-1 is 8%, Contract Years 1-2, 7%, Contract Years 2-3, 6%, Contract Years 3-4, 6%, Contract Years 4-5, 5%, Contract Years 5-6, 4%, and Contract Years 6-7, 3%. After Contract Year 7, the maximum withdrawal charge is 0%.

Fund Inception Date. This represents the inception date of the fund and may predate the offering of the fund through a subaccount in the separate account. Where this occurs, the performance is hypothetical in that it depicts how the investment options would have performed had it been available in the separate account during the time period.

Subaccount Inception Date. This represents the date on which the Subaccount that invests in a particular Fund was included as an investment option in Delaware Life Separate Account F.

Non-Standardized. Results in this column are hypothetical and may reflect the historical performance of the subaccount prior to the inclusion of the fund as a subaccount in the separate account containing the variable annuity. Performance reflects underlying fund fees and expenses (after any applicable fee waivers or expense reimbursements) and the asset charge of 1.20% (stated as a percentage of average variable account assets and also known as the mortality and expense risk charge). These results do NOT include withdrawal charges or the annual contract fee. If withdrawal charges and the annual account fee were included, they would reduce the performance shown. These results do NOT include any charge for optional living and optional death benefits.

Adjusted Non-standardized Returns. Results in this column may be hypothetical and assume contract surrender at the end of the applicable period. Performance reflects underlying fund fees and expenses (after any applicable fee waivers or expense reimbursements) and the asset charge of 1.20% (stated as a percentage of average variable account assets and also known as the mortality and expense charge). These results include the applicable withdrawal charge at the following rate: 8%, 7%, 6%, 6%, 5%, 4%, 3% during the 7-year withdrawal charge period and the \$30 annual contract fee (prorated for a median sized contract of \$100,000 and waived if the net contract value > \$100,000 on the contract anniversary). Hypothetical returns are computed by applying charges and expenses to a Fund since its inception. These results do NOT include any charge for optional living and death benefits.

Standardized. Historical results reflect the performance of the subaccount(s) since the date they were first offered as investment option(s) in the separate account that contains the variable annuity contract. Performance reflects fund fees and expenses (after any applicable fee waivers or expense reimbursements) and the asset charge of 1.20% (stated as a percentage of average variable account assets and also known as the mortality and expense risk charge). These results include the applicable withdrawal charge at the following rate: 8%, 7%, 6%, 6%, 5%, 4%, 3% during the 7-year withdrawal charge period and the \$30 annual contract fee (prorated for a median sized contract of \$100,000 and waived if the net contract value > \$100,000 on the contract anniversary). These results do NOT include any charge for Optional Living Benefits or Optional Death Benefits.

There is no guarantee that the underlying funds will meet their stated goals or objectives. The underlying funds may decline in value due to risks and factors including, but not limited to, real or perceived adverse economic, political, or regulatory conditions, inflation, changes in interest or currency rates or adverse investor sentiment. Adverse market conditions may be prolonged and may not have the same impact on all types of mutual funds. The funds' values may decrease due to factors affecting a fund class, industry or the securities market. You should read your underlying fund prospectus before you invest.

Investment Category Descriptions:

Cautious Allocation – invested in multiple asset classes including stocks, bonds and cash seeking both income and capital appreciation. Equity exposures are between 30% and 50%.

Moderate Allocation – invested in multiple asset classes including stocks, bonds and cash seeking both income and capital appreciation. Equity exposures are between 50% and 70%.

Aggressive Allocation – invested in multiple asset classes including stocks, bonds and cash seeking both income and capital appreciation. Equity exposures are between 70% and 85%.

Fixed Income – invested in U.S. and global bonds and other interest-bearing investments.

Domestic Large Cap – invested primarily in stocks of U.S. companies with market capitalization of approximately \$10 billion or more.

Small & Mid Cap – invest in small and/or midsize company stocks may be more volatile and involve greater risk, particularly in the short term, than those investing in larger, more established companies.

Global Equity Large Cap – invested primarily in stocks of global companies with market capitalization of approximately \$10 billion or more.
